

<p>House of Friendship</p> <p>Dolphins are friendly and outgoing. Being social and approachable comes naturally and they communicate using vocalizations such as whistles, clicks, and echolocation. Throughout their lives, dolphins interact and form relationships with a wide variety of people. Friendly dolphins welcome all students and exude kindness.</p> <p>Color: Blue</p>	<p>House of Curiosity</p> <p>Dolphins are extremely curious. They are not curious because they want to do anything with the new information, but simply to make sure they do not miss out on attaining the knowledge. Being curious improves dolphins' fitness and survival chances. Curious dolphins ask questions and seek out the optimal variables conducive to high levels of success.</p> <p>Color: Yellow</p>
<p>House of Unity</p> <p>Dolphins travel in large groups called pods, sometimes containing up to 100 individual dolphins. Members of a pod form strong bonds and work together to help each other and protect the group. United dolphins believe in community over self and protect the pod.</p> <p>Color: Green</p>	<p>House of Intelligence</p> <p>Dolphins' brains are considerably larger than what their bodies require for basic bodily functions, leaving the excess brain matter to power their ability to be one of the most intelligent species on the planet. Dolphins have a large memory capacity and are one of very few species who can recognize their own reflection in a mirror. Intelligent dolphins approach obstacles as opportunities to learn and grow.</p> <p>Color: Red</p>
