

# AP STATISTICS

THE COURSE YOU REALLY WANT TO TAKE!

**WHY:** Most businesses and college degrees require knowledge of probability and statistics. This is the most useful (and fun!) math course you will ever take.

**WHAT:** *Determine probabilities, perform statistical experiments, discover business persons who really use this stuff (and make LOTS of \$\$ with it), work on individual projects that can be used for a portfolio or passed down to your children and grandchildren. (Did I mention that the work can be fun?)*

**WHAT ELSE:** LEARN OTHER MATH TOPICS OFTEN LEFT OUT OF THE TRADITIONAL COURSES. (THE FUN STUFF!)

**WHAT FOR:** A genuine math credit. It will look good on your transcript! (And you will have fun!)

**WHO SHOULD YOU TELL:** *Your parents and friends. I'll bet they're playing with this at work (And having fun!)*

**WHY:** BECAUSE YOU ARE PROBABLY GOING TO NEED IT SOONER OR LATER SO TAKE IT WHILE IT IS FREE (AND FUN!)

Sign up for AP Statistics with your counselor.  
(Odds are - you will be glad you did!)
