# Connecting a Laptop to the ActivPanel

To connect your laptop to your Elements Series ActivPanel, begin with either a VGA or HDMI cable and a USB cable. The VGA or HDMI enables a visual connection with the USB cable enables touch.

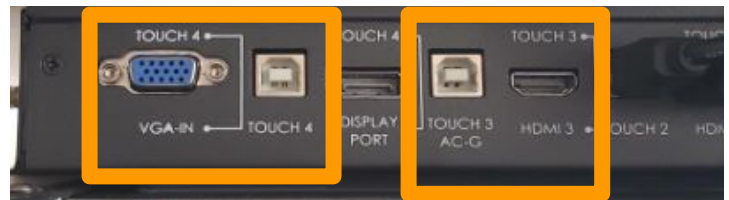

VGA   HDMI   USB

Ports on your ActivPanel are clearly labeled on the side and in the front.

Front view - Source HDMI 1

Side View - Sources VGA or HDMI 3

Open the Unified Menu on the ActivPanel and click on Source or on the remote click on the source button and choose the source you have connected to.

* If your laptop display does not appear on the screen, click on the Windows + P buttons and either Duplicate or Extend your display
