# **Academy Mission**

The Career Academy for Future Educators grows GIANTS by preparing and inspiring students to pursue a career in education through rigorous and relevant curriculum and an environment supportive of lifelong learning and community involvement.

# **Academy Purpose**

Students will be immersed in a learning environment that encourages student responsibility, motivation, and commitment to learning. Allowing students to identify, create, and solve problems while meeting rigorous academic demands, within an ethical learning community emphasizing trust and cooperation. Academy students receive a multidimensional curriculum through partnerships with business, industry and the local community that incorporates experiential learning and community service, that exposes students to career and educational pathways.

### STATEMENT OF ETHICS AND RESPONSIBILITIES

The GCCISD College and Career Academy is a learning community in which knowledge is the ultimate quest. However, the pursuit of knowledge is diminished unless it is combined with a parallel quest for honesty, compassion, and respect for others. The Academy community defines this quest in the following statement of ethics and responsibilities.

Academy students are committed to:

- Learning for the sake of learning rather than simply to "get the grades."
- Taking advantage of the learning opportunities provided.
- Being responsible for their choices and actions.
- Following through with their obligations in private as well and in public.
- Being involved in Academy activities.

Academy parents are committed to:

- Supporting and encouraging students, faculty, and administration.
- Providing support to students without undue pressure or assistance.
- Accepting the grades or results that their students have earned.
- Being involved members of the Academy community through their time and talents.

Academy faculty members are committed to:

- Providing meaningful educational classroom activities and homework.
- Striving to clearly communicate their expectations to students.
- Establishing fair and consistent grading practices for students.
- Being receptive to ideas and issues expressed by students.

Academy administration is committed to:

- Providing an environment that promotes ethical behavior and learning
- Developing, communicating, and enforcing clear and consistent policies.
- Investigating and resolving problems in a timely, confidential, and appropriate manner.

All members of the Academy community are committed to respecting themselves and each other and to striving for high personal and academic standards. In this way, each individual will be a positive influence and role model for others and for society.
