

Recruitment Events GALORE – Oh my!

This October has been a bustling month of engagement and exploration as we connected with future STEM students and supported our current learners in pursuing exciting academic and career opportunities. Here's a look at our latest events:

Recruitment at Baytown Junior School

We recently visited Baytown Junior School to introduce 8th graders to the unique opportunities at our STEM Academy. Through interactive presentations and discussions, we showcased our hands-on programs, including engineering and computer science. Students were eager to learn how our Academy's specialized pathways could set them on a successful course for the future.

Maritime & Logistics 8th Grade Tours

Our 8th-grade Maritime & Logistics tours gave students an inside look at one of our most dynamic career pathways. Students explored the world of global trade, transportation, and logistics and learned about the growing demand for skilled professionals in these fields. This immersive experience allowed students to see how STEM Academy programs align with real-world industry needs and job opportunities.

College and Career Night at GCM

At College and Career Night, we provided our GCCISD students and their families with valuable information on post-secondary options. Our STEM Academy representatives shared insights on college readiness, internships, and STEM career pathways, helping students envision how their time in our Academy can lead to fulfilling and impactful careers.

PTECH Program Field Trip to Lamar University

As part of our commitment to the PTECH program, STEM Academy students are provided with field trips that support their college and career aspirations. This year, our junior students will have the exciting opportunity to attend a field trip to Lamar University on November 8th, 2024. Students will explore the university's diverse STEM programs, including engineering, computer science, and health sciences, providing valuable insights into potential career paths. **As a reminder, students on probation within the academy cannot attend field trips.**

Field trip permission slips can be obtained in the College & Career Center. Students are expected to bring lunch money (\$15).

These events play a crucial role in broadening students' perspectives and preparing them for success in high school and beyond. We're proud to be fostering an environment where our students can explore, learn, and grow.

Student Spotlight – November Giant of the Month Ricarri Blow – REL STEM Academy Senior

In Case You Missed It

This month, we shine a light on Ricarri Blow, a senior in the STEM Academy whose achievements both in and out of the classroom are truly inspiring. Ricarri excels as an offensive lineman and brings that same dedication to his roles in the National Honor Society and National Technical Honor Society. As Vice President of the Student Body, he fosters a positive and ambitious spirit across campus, always representing with true Gander Pride. Outside of school, Ricarri serves as a youth pastor, where he shares his passion and commitment with his community. We're proud to have such a spirited and accomplished leader in our academy!
